## ► What Action?

We are working to ensure young people can access friendly and confidential services quickly to address their drug and alcohol use and other problems in their lives which are contributing to their use. We are working with young people to improve this and would welcome any other young people's support and input in getting this right.

We are providing a range of positive activities for young people using substances such as DJ workshops, dance workshops, quad biking and football with Portsmouth Football Club. We will continue to work with providers of these activities to ensure they are accessible to young people using substances.
